

# **Develop State/NOAA Coordination & Technical Support**

## **November 2000 Status Report**

The final Windows version of the HTDB/US program is being checked out now. The new operating manual has been received and will be reviewed over the next few weeks. The anticipated distribution at the Steering Group meeting will slip into December when a copy of the CD containing the program and the Manual will be distributed to all Steering Group members.

Although not directly related to the NTHRP a beta version of this program in DOS format, targeted at the Inter American Sea (IAS) and the US East Coast has been prepared and will be demonstrated at the the Workshop on the IAS Tsunami WArning System being held at Mayaguez, P.R. in mid-December
